May cause severe poisoning can even lead to death. Of poisoning by cyanide or hydrocyanic acid can cause paralysis of the respiratory center and rapid anoxia of tissues for interference on the normal absorption of 'oxygen by the blood. The earliest signs of intoxication are: fatigue and heaviness in the legs and arms, increasing difficulty in breathing, headache, dizziness, breathing cessation.

The toxicity of the product as such is not known. For potassium cyanide lethal human dose is 2.8 mg / kg . The lethal dose for man concerning the hydrocyanic acid is 100-150 ppm for a 30-60 minute exposure. For prolonged exposure to concentrations that will not cause acute poisoning may occur headache, asthenia, dizziness, digestive disorders (nausea, vomiting, abdominal cramps), impaired olfactory faculties, conjunctivitis.
